unmistakable quality . . . spectacular service

Oscar Noel, D.O.

Center for Spine and Orthopedics

Specializing in sports medicine, arthroscopic surgery, joint replacement of the knee, hip and shoulder, general orthopedics and orthopedic trauma care.

Upon completion of the activity, the participant should be able to:

- Discuss a good knee exam
- Describe non-operative treatments for knee osteoarthritis.
- Identify the risks and benefits of total knee replacement.
- State how to optimize a patient for total joint replacement
- Explain patient expectations in the peri-operative period and beyond.

Michael Kersten, M.D.

Colorado Imaging Associates

Fellowship Trained: Musculoskeletal Radiology

Upon completion of the activity, the participant should be able to:

- Describe where to begin with imaging of knee pain, based on patient presentation.
- Describe strengths and limitations of knee imaging by Xray, CT, MRI, US, and Nuclear medicine
- Describe commonly used grading systems for the evaluation of knee osteoarthritis, and the appearance of OA on different modalities.
- Describe imaging of the knee after arthroplasty.
- Describe the radiographic diagnosis and treatment of Baker's cyst

Disclosure

This activity is jointly provided by SynAptiv and Health Images. The planners and faculty report no relevant financial relationships with commercial interests to disclose.
