

InteleShare at Envision Radiology: Compliance and Security You Can Trust

InteleShare enables an efficient, HIPAA compliant, and secure way to share, store, and view diagnostic images. This means your organization can securely and compliantly exchange studies to your PACS and viewing stations with Envision.

Committed to Standards and Interoperability

InteleShare is committed to delivering infrastructure, viewer, privacy, and integration compliance that provides confidence and trust.

Fully Compliant with HIPAA/HITECH and HITRUST

InteleShare is committed to ensuring compliance with common regulatory and GxP (GCP) standards, including HIPAA/HITECH and HITRUST. InteleShare cannot and does not send information from an InteleShare account without authorization, which is requested securely online with strict audit trails.

SOC 2 Compliance

As a cloud provider, InteleShare's SOC 2 compliance for its data center ensures adherence to strong security, availability, processing integrity, confidentiality, and privacy best practices.

FDA Class II Viewer

InteleShare's 510(k) cleared viewer is FDA Class II compliant. This provides you with assurance that you can manage, view, and interpret medical images using a next generation cloud PACS and HTML5 zero footprint diagnostic viewer.

Comprehensive HL7 Support

InteleShare is a leader in interoperability, managing bi-directional workflows of both DICOM and HL7 information between systems, as well as with third-party applications.

What This Means for You

With InteleShare, you can have confidence that patient studies are managed securely and compliantly.
